PROFESSIONAL PROFILE

Industrial Engineering student and Higher Technical Degree student in Artificial Intelligence, with a self-taught approach to building real AI-driven solutions. I combine analysis, technology, and execution to transform ideas into functional products with measurable impact. My professional focus integrates continuous learning, model implementation, and full-stack development to solve practical challenges in Panama and broader contexts.

CORE TECHNICAL SKILLS

- Artificial Intelligence: LLMs, NLP, fine-tuning, RAG, prompt engineering, intelligent agents.
- Programming: TypeScript, React, Next.js, Python, FastAPI, AI API integration.
- Data and analytics: data analysis, scraping, result validation, continuous optimization.
- Product execution: rapid prototyping, practical UX, deployment, and early-stage scaling.

ACADEMIC BACKGROUND

BSc in Industrial Engineering

ADEN University - 2025 | Estimated graduation: April 2027

Higher Technical Degree in Artificial Intelligence

ITSE - 2025 | Estimated graduation: December 2026

High School Diploma (Sciences and Letters)

Colegio San Agustin de Panama - 2017

PROFESSIONAL CERTIFICATIONS

Claude Code in Action

Anthropic - March 2026 | Certificate: #8qiuu3ub3g6u

Claude 101

Anthropic - March 2026

AI Fluency for Students

Anthropic + UCC + Ringling + HEA - March 2026

Master in Artificial Intelligence (in progress)

Daxus Latam - 2025-2026

Specialized Program in Applied Artificial Intelligence for Business

ADEN Business School - 2025

Bilingual Status C2 (Spanish/English)

Florida State University - January 2026

PROJECTS AND KEY ACHIEVEMENTS

Vitae.ai - Founder and lead developer (2025-present)

- I designed and built this exact digital CV to present my profile in a modern and interactive format.
- The platform integrates conversational AI, multilingual support, and recruiter-oriented UX.
- Future vision: evolve Vitae.ai into a SaaS ecosystem for modern AI-powered CV creation.

Conecta Panama - 1st Place MUPA Hackathon (2025-present)

- Co-created an AI citizen super app focused on access to information, education, entrepreneurship, and essential services.
- Winning MVP developed with DeltaWaves (4-member team) and later moved into institutional collaboration.
- Repository remains private due to project agreements with Panama City Hall.

TYR (ITSE) - University virtual assistant with NLP (2025)

- Implemented a fine-tuned BERT model with 98.93% accuracy on institutional queries.
- Built complete integration between React PWA frontend and FastAPI backend for real student use.

ALERTA-ED (SENA) - AI for school dropout prevention (2025)

- Developed an offline-first dashboard for early detection and monitoring of dropout risk.
- Designed analytics and visual outputs for practical use by teachers and student support teams.

Tin.io - AI content dashboard (2025-2026)

- Built an experimental product to improve content workflows, productivity, and product decision-making.

WORK EXPERIENCE

Data Science Internship - DETA (Panama)

November 2025 - January 2026

- Contributed to tech labor market analysis and internal initiatives with LLMs, scraping, and data workflows.
- Applied prompt engineering and analytical thinking in a real professional environment.

LANGUAGES

- Spanish: Native
- English: C2 (FSU Bilingual Status, full verbal and written proficiency)
- Portuguese: Basic level, currently learning
