INTERACTIVE CV

PROFESSIONAL SUMMARY

I study Industrial Engineering and Artificial Intelligence at the same time, and I love combining them to solve real operations problems. At Philips I built the Copilot Studio agent my procurement team uses; with PO Guru I won the Philips LATAM AI Hackathon 2026, and with Conecta Panamá, the ITSE x Panama City Municipality hackathon. I taught myself English to C2, and that is how I pick up every new tool. I finish both degrees in April 2027; next comes a master's in AI.

AI agents · Copilot Studio · Process automation · Procurement (SAP, Ariba) · Process improvement and KPIs · Power BI · Python · Team leadership

KEY ACHIEVEMENTS

- **1st place, Philips LATAM AI Hackathon 2026** (91 teams, 340+ participants, 8 countries). As team lead of ProcureNation I owned the AI, architecture and build of PO Guru: an assistant in Copilot Studio, Teams and Outlook that checks a purchase request against the rules and hands it over ready for a person to approve. We built the MVP in 24 hours, won the Panama semifinal and, a week later, the regional final.
- **AI agent for the Philips procurement process.** I built it in Copilot Studio and the team uses it today: it answers questions from buyers, requesters and other stakeholders about the whole operation, citing the exact procedure.
- **1st place, ITSE x Panama City Municipality Hackathon 2025** with Conecta Panamá, an AI civic super app. I designed the interface and built the code; the Municipality took an interest in implementing it.

WORK EXPERIENCE

Operational Procurement Intern, Philips · Panama — Apr 2026 - Present

- Run the purchasing cycle end to end, from approval in Ariba to purchase order in SAP, measured against four time and quality KPIs.
- Led the workstream that unified the SOP, work instructions and harmonized work instructions into one central platform for buyers and their managers. Now in testing with the team.
- Designed a no-code operations dashboard (requisitions, approvals and KPIs) that replaced manual reports in daily follow-up.

Speaker and Technical Lead, Expo Logística Panamá 2026 (ITSE) — Mar 2026

- Demoed TYR AI live to more than 100 transport, freight and 3PL companies: a logistics operations copilot with LLaMA 3.3 70B and a knowledge base on the Panama Canal, the Colón Free Zone and Incoterms 2020.

Data Science Intern, DETA · Panama — Nov 2025 - Jan 2026

- Analyzed the tech job market for internal projects at a data science and automation startup, using scraping, data processing, LLMs and prompt engineering.

EDUCATION

BSc in Industrial Engineering, ADEN University — 2025 - Apr 2027 (expected)
Includes transfer credits from my previous electrical and electromechanical engineering studies.

Higher Technical Degree in Artificial Intelligence, ITSE — 2025 - Apr 2027 (expected)
Machine learning, deep learning, NLP, computer vision, data science and AI ethics.

Electrical and Electromechanical Engineering coursework, Universidad Tecnológica de Panamá and USMA — 2018 - 2024
Technical foundation, credits transferred.

PROJECTS

- **TYR · ITSE (2025).** University assistant with a fine-tuned BERT model that answers the questions students used to send by email: 98.93% accuracy on institutional queries. React PWA and FastAPI backend.
- **ALERTA-ED (2025).** Offline-first dashboard proposing a predictive system to detect school dropout risk in Panama, with visualizations built for teachers without a technical background.
- **tincho.ia (2026 - Present).** I teach Claude, Claude Code, Codex and agents from scratch on TikTok and Instagram.
- **This site (2025 - Present).** My interactive CV, with 3D and sound, designed and built with AI (Claude Code and Codex). This PDF comes from the same data.

SKILLS

- **Applied AI:** AI agents, Microsoft Copilot, Copilot Studio, LLMs, RAG, NLP, fine-tuning (BERT), prompt engineering, Claude Code, Codex.
- **Industrial engineering:** operations management and research, quality, work study, KPIs and balanced scorecard, project evaluation, change management.
- **Procurement:** SAP, Ariba, PR-to-PO cycle, procurement KPIs, SOP and process documentation.
- **Data and tools:** Power BI, advanced Excel, SharePoint, dashboards, scraping, PowerShell.
- **Development:** Python, FastAPI, TypeScript, React, Next.js.

CERTIFICATIONS

Master in Artificial Intelligence, Daxus Latam — 2025 - 2026

Specialized Program in Applied AI for Business, ADEN Business School — 2025

Claude Code in Action, Claude 101 and AI Fluency for Students, Anthropic — Mar 2026

Python Master and Advanced Python, Daxus Latam and Codecademy — 2025

Introduction to Modern AI and Operating Systems Basics, Cisco — 2025

Power BI Essential Training, LinkedIn Learning — Sep 2026
